IMAGING IN GYNECOLOGY AND ITS IMPACT ON THE MANAGEMENT OF THE PATIENT:
THE ROLE OF IMAGING IN COMMON UTERINE AND ADNEXAL PATHOLOGIES
PARIS 28-29 NOVEMBER 2019
As chairpersons of the new course organized by the European School of Obstetrics and Gynecology (ESOG), we are very pleased to invite you to participate in this high-quality class dedicated to “the role of imaging in common uterine and adnexal pathologies”.

This course will provide to the participant the basic information on the clinical and surgical applications of the actual 2D-3D transvaginal ultrasound (TVS) and MRI to adequately manage the most frequent gynecologic pathologies. The participants will learn how to evaluate by TVS intrauterine pathology and how to best visualize uterine fibroids, distinguish them from adenomyosis and subsequent treatment. Great emphasis will be given to learn how to assess ovarian pathology, functional versus pathologic cyst, benign versus malignant tumors and how ultrasound findings can best prepare the gynecologic surgeons for a more complete surgery.

We look forward to seeing you in Paris,

Caterina Exacoustos
Michelle Nisolle
Chairpersons of the course
Thursday 28 November 2019

09:30  Stefano Guerriero (IT)  Leiomyomas: ultrasound features associate to benign or malignant lesions
10:15  Isabelle Thomassin Naggara (FR) Are there MRI features to diagnose atypical uterine myomas?
11:00  Michelle Nisolle (BE) The interest of myomas imaging before surgery
11:45  Q&A
12:15  Timmerman Dirk Ultrasound diagnosis of adenomyosis
13:00  LUNCH BREAK

14:00  Margit Dueholm (DK) MRI criteria of adenomyosis
14:45  Stephan Gordts (BE) Histological classifications of adenomyosis and the interest of adenomyosis imaging before surgery
15:30  Q&A
16:00  BREAK
16:30  Lucia Lazzeri (IT) Evaluation of the tube and tubal patency
17:15  Caterina Exacoustos (IT) US Criteria to diagnose uterine congenital anomalies
18:00  Stephan Gordts (BE) Hysteroscopic assessment in infertile patients: the interest of uterine cavity and tubal imaging before surgery
19:30  Q&A
Friday 29 November 2019

08:30  Caterina Exacoustos (IT) 2D and 3D Ultrasound evaluation of the ovary and criteria to diagnose PCO

09:15  Andrea Genazzani (IT) Management of PCO: role of imaging

10:00  Q&A

10:30  BREAK

11:00  Michelle Nisolle (BE) Laparoscopic treatment of adnexal masses: difficulties and complications. Role of imaging in pre-surgical work up

11:45  Dirk Timmerman (BE) Managing ovarian masses: how to classify masses using IOTA terminology, rules and models

12:30  Davor Jurkovic (UK) Ultrasound features of malignant adnexal pathologies

13:15  Q&A

13:30  LUNCH BREAK

14:30  Davor Jurkovic (UK) Evaluation of the endometrial cavity using 2D and 3D TVS to diagnose polyps, fibroids, adhesions or other intracavitary pathology

15:15  Antoine Watrelot (FR) Treatment of endometriosis and role of imaging

16:00  Stefano Guerriero (IT) Endometrioma ultrasound features and cancer risk

16:45  BREAK

17:15  Margit Dueholm (DK) Diagnosis deep infiltrating endometriosis (DIE): MRI evaluation

18:00  Caterina Exacoustos (IT) Diagnosis deep infiltrating endometriosis (DIE): Ultrasound staging

18:45  Q&A

19:15  CONCLUSIONS
